Yamato Transport Co., Ltd.

Launch of "Kuroneko Light Freight Charter" Quickly Responding to Diverse Needs 24/7/365 Such As Urgent Delivery and Spot Delivery

Completing Online from Quotation to Order Placement in as Little as 1 Minute on Business Members-Only Service "Yamato Business Members"

Yamato Transport Co., Ltd. (Headquarters: Chuo-ku, Tokyo; Representative Director and President: Seiichi Awa; hereinafter "Yamato Transport") announces that it will launch "Kuroneko Light Freight Charter" (hereinafter "the Service") starting Wednesday, October 28, 2026. Through "Yamato Business Members" (hereinafter "YBM"), a members-only service for corporate customers registered by approximately 1.8 million companies, the Service responds to diverse delivery needs, such as "urgent delivery for items that need to be delivered right away" and "spot delivery to address temporary increases in demand." Furthermore, procedures from quotation and ordering to tracking delivery status are completed end-to-end online, and billing is consolidated with monthly TA-Q-BIN fares, thereby significantly reducing the operational burden on corporate customers, such as arranging light freight vehicles in emergencies and post-delivery accounting tasks.

■ Features of the Service

1. Easy Online Arrangements in as Little as 1 Minute

Everything from quotation to ordering is completed online through YBM. By simply entering the required information on the screen and waiting for applications from delivery drivers, vehicle arrangements are completed from among over 100,000 delivery drivers nationwide in as little as 1 minute. In addition, customers can check the current location and delivery status of delivery drivers in real time online.

2. Direct Delivery to Specified Locations with Chartered Vehicles Available 24 Hours a Day, 365 Days a Year

The Service is available 24 hours a day, 365 days a year, including late nights and early mornings, with pickups made in as little as 30 minutes from the time of request. Furthermore, chartering a single light freight vehicle to deliver directly to the destination without transshipment makes it ideal for urgent delivery, spot delivery, Just-In-Time delivery to specified times, and delivery of precision equipment that is difficult to package.

3. Reducing Accounting Workload through Consolidated Billing with TA-Q-BIN Fares

Usage fees for the Service will be billed by Yamato Transport together with monthly fares and charges for TA-Q-BIN, etc. This reduces the burden of accounting tasks, such as paying cash on each occasion, opening new accounts, and processing individual invoices.

■ Overview of the Service

Launch date	Wednesday, October 28, 2026
Eligible customers	Customers with a corporate (accounts receivable) contract with Yamato Transport and registered with YBM
Main use cases	● Urgent delivery for items that need to be delivered right away ● Just-In-Time delivery to be delivered at a specified time ● Spot delivery to address temporary increases in demand ● Delivery of items that are difficult to package, such as precision equipment ● Delivery of items exceeding TA-Q-BIN standards (total of 3 sides up to 200 cm or weight up to 30 kg)
How to use	1. Log in to YBM and access the service page 2. Enter desired conditions (pickup location, delivery address, pickup/delivery date and time, etc.)

	3. Check the quotation amount displayed on the screen and submit the request 4. Check applications from delivery drivers and select a driver 5. The delivery driver delivers based on the requested details *Delivery requests are finalized and fees are incurred at the point when a delivery driver is selected. *This service provides a system to arrange delivery drivers according to request details, and does not guarantee transportation at the time of request. (Contract success rate: 96.5%, actual results from January to December 2025) *About Yamato Business Members: https://business.kuronekoyamato.co.jp/service/lineup/business_members/index.html
Usage fees	2 types: Distance-based / Time-based (quotation amounts can be checked on the user screen)
Payment method	Billed together with TA-Q-BIN fares and charges

*Freight delivery in the Service is provided via the delivery platform "PickGo" provided by CBcloud Inc. Cargo transportation contracts are concluded between the customer and CBcloud Inc.

■ Background and Purpose

In recent years, along with the diversification of supply chains and the acceleration of business speed, delivery needs among corporate customers have become increasingly complex and sophisticated, resulting in numerous sudden and highly urgent delivery requirements.

On the other hand, traditional light freight charter arrangements involve many procedural challenges, such as "the hassle of requesting via phone or FAX," "waiting time until vehicle dispatch is confirmed," "unclear delivery status," and "processing individual invoices and paying cash each time."

To solve these customer challenges, Yamato Transport enables speedy and seamless arrangement of light freight charters from the YBM portal site that customers regularly use for shipping TA-Q-BIN, thereby contributing to solving issues for customers with diverse delivery needs.
