

Yamato Group Environmental Policy

The Yamato Group pursues business activities that contribute to the protection of the environment as a company working toward the well-being and enrichment of society in the future. As part of a sustainable social infrastructure, we provide environmentally friendly goods and services, protect the earth's environment, which is the basis of life for present and future generations, and contribute to the realization of the well-being and enrichment of society.

1. Reduction of Environmental Burden and Prevention of Pollution

- (1) Carry out environmentally friendly procurement.
- (2) Use energy efficiently, reduce energy consumption, and promote the use of renewable energy. Reduce greenhouse gas emissions with the aim of achieving climate neutrality to mitigate climate change.
- (3) Value limited resources, promote the reuse and recycling of resources, reduce waste, and pursue resource conservation.
- (4) Optimize land use to conserve biodiversity and conduct sound chemical substance management.
- (5) Strive to prevent environmental pollution, such as air, water, and soil pollution, and minimize our negative impact on human health and the environment.

2. Provision of Sustainable Goods and Services

- (1) Consider the environmental impact across the life cycle of our goods and services as well as develop and provide goods and services with a lower environmental burden that improve quality of life.
- (2) Lead the transition to achieving carbon neutrality and sustainable patterns of consumption in society by actively proposing and providing environmentally friendly goods and services.

3. Environmental Management and Compliance

- (1) Entrust top management with implementing an environmental management system, monitoring environmental performance, and making continual improvements.
- (2) Comply with environmental laws and regulations, international environmental standards and agreements, and the Company's own environmental code.
- (3) Provide opportunities to deepen knowledge of the environment to raise awareness in everyone involved in the business, including business partners, and promote the creation of value and the reduction of the environmental impact of daily business activities.

4. Collaboration and Communication

- (1) Deepen collaboration and cooperation with various partners with the aim of creating value

that realizes improved quality of life and environmental protection. Cooperate with partners to use technology and advance initiatives to resolve environmental issues, such as mitigating climate change by reducing greenhouse gas emissions and adapting to the impacts of climate change, and to enhance resilience.

- (2) Endeavor to earn the trust of our stakeholders by increasing the transparency of our business activities through means such as conducting stakeholder engagement and enhancing communication and the disclosure of environmental information.
