Yamato Logistics India Private Limited

## Yamato Logistics India Establishes Yamato Group's First Logistics Centers at Three Locations in India

To support the optimization of customers' global supply chains

Yamato Logistics India Private Limited (Headquarters: Republic of India; Representative Director and President: Daishiro Kuga, hereinafter "YLI"), a group company of Yamato Holdings Co., Ltd., is pleased to announce that it established logistics centers in Manesar, Bengaluru, and Ahmedabad in India and began operating them successively from July 25.

### 1. Background and Purpose

In India, automobile manufacturing is one of the major industries, and domestic and overseas manufacturers are increasing the production volume of completed vehicles and parts. In recent years, not only domestic sales but also exports to Africa, the Middle East, etc. have increased. YLI, which was established in 2008, has provided in-house logistics services<sup>\*1</sup> mainly for automobile manufacturers in India until now. On this occasion, it established logistics centers in Manesar, Bengaluru, and Ahmedabad and started operating successively from July 25. This is the first time for the Yamato Group to establish logistics centers in India.

YLI will now provide services such as just-in-time delivery<sup>\*2</sup> of manufacturing parts from domestic and overseas suppliers to production plants and domestic and international transport of parts by establishing logistics centers in areas near industrial zones. Furthermore, it will effectively combine such services, propose solutions for optimizing the entire supply chain including areas inside and outside India, and support customers' businesses through efforts such as the reduction of total logistics costs, improvement of production efficiency, and reduction of environmental burden.

<sup>\*1</sup> Provision of logistics services within the facilities of customers

<sup>\*2</sup> Delivery of necessary things in the required quantity to plants when necessary
